## Final Results of High School Exams

Below will be found the full results of the final examination results of the pupils in the Wainwright public high school, as kindly supplied to us by Principal M. Meade, B.A.

**GRADE XII**

Subjects	Written	Passed
Wallsten, Ruth	8	8
Cardell, Thomas	8	8
Dewar, Ailie	6	6
Fraser, Bernice	6	6
Lilly, Charles	6	6
Lilly, Helen	6	6
Schlick, Dorla	5	5
Wallace, Betty	3	3
Stuart, Hazel	7	6
Fraser, Donna	6	6
Brunker, Wilma	7	5
Peacock, Ma	7	5
Dahl, Lawrence	5	3
Perkins, Irene	7	3
Rattray, Alex.	4	2
Fraser, Morris	6	2
Renville, Joyce	2	1

—Pass: 80.2%

**GRADE XI**

Graham, Ellen	8	8
Snyder, Roberts	8	8
Branchflower, Cora	7	7
Branchflower, Douglas	7	7
Dixon, Jean	7	7
Dundas, Ione	7	7
Jones, Dillys	7	7
Edger, Lillian	7	7
Schlick, Donald	7	7
Rathwell, Leona	6	6
Smith, Alma	6	6
Edbern, Ruth	7	6
Fraser, Agnes	7	6
Hewitt, Olive	7	6
Rutherford, Kathleen	6	6
Seala, Irene	6	5
Bayrack, Stanley	7	5
Sheridan, Berle	7	5
Souter, Gladys	7	5
Patterson, Marshall	8	4
Brunker, Carleen	6	3
Wilson, Fred	7	3

—Pass: 84.1%

**GRADE X**

Carl, Wallace	8	8
Clark, Velma	8	8
Olson, Dolores	8	8
Hannah, Colin	8	8
King, Esther	8	8
Merchant, Margaret	8	8
Murray, Jean	8	8
Perkins, John	8	8
Street, Beulah	8	8
Taylor, Mary	8	8
Wear, Charles	8	8
Baker, Myrie	7	7
Carroll, Beale	8	7
Hardy, John	8	7
Huntingford, Walter	8	7
Callis, Alex.	8	7
Gano, Marjorie	8	6
Muncaster, Lila	8	5
Ricker, Beverly	8	5
Patterson, Molly	7	4

—Pass: 90.5%

**GRADE IX**  
A—Della Cotton, Allen Dixon, Leslie Fuller, Washburn Laird, Robert Lilly, James Pon, Gordon Schlitt, Herbert Snyder.  
B—Marguerite Brunker, Stanley Church, Marjorie Coffed, William Coleman, Georgina Glass, Ruth Harden, Elsie Murray, Edwin Nordstrom, Lorna Reid, June Seabrook, Marjorie Taylor, Ellen Williams, Catherine Wyllie.  
C—Melvin Freed.  
D—Stanley Drewick, Ellen Street.  
—Pass: 87.5%  
The following pupils (XII, XI and X) passed with honors: Betty Wallace, 88; Thomas Cardell, 76; Ellen Graham, 83; Cora Branchflower, 81.5; Jean Dixon, 77; Roberts Snyder, 76; Velma Clark, 87; Mary Taylor, 84.  
The foregoing summary has to do entirely with subjects listed in the curricula set by the department of education.

**Personal**  
After an absence of five years, Mrs. A. C. Armstrong and her son Munroe drove west from their home in the East and arrived last week to spend a holiday with relatives in town.  
Mrs. Grace Carlisle has now left for Vancouver, B.C., the location of her future home.  
After spending a holiday in the city with friends, Mrs. E. V. Springett has now returned to her home here.  
Mr. and Mrs. Evan Harold, of Edmonton, visited Mrs. Harold's brother, Mr. Sam Aykroyd, last week.  
Mrs. R. T. Wright, of Hardisty, was over to visit with her daughter Elsie last week.

## Happy School Days Are Here Again!

Ding! Dong! Ding! Dong! School days again are here, just here those happy children cheer! Whoopee-ee! Taking the pupils, students, teachers and parents as a whole, each and all are glad to see the schools open again. "All work and no play makes Jack a dull boy" is true also of the reverse manner of living, all play or leisure hours become monotonous. The question which is facing many pupils and students is the vocation to follow, the one to which one is adapted and in which one could make a success. It has been strongly advocated however that if a student is undecided it is better to make a decision and fix a goal even though one may change his mind later in life, than to drift.  
As an incentive and assistance to those not wishing to attend Normal school or University, the Department has provided for commercial classes in the curriculum. Many town schools have taken advantage of this and have found it of great benefit to many students.

## First New Grain Reaches Elevators

The first threshing of the 1938 season reached the elevators last week end, and from all appearances our farmers are about to realize the hopes held for several years past of a splendid yield of high-grade grain.  
On Saturday Mr. Ross Vallau of Greenhills threshed and delivered to the Pool elevator at Greenhills 300 bushels of wheat which graded No. 1 and was a real heavy sample.

On Monday, Bill Bibby, at the U.G.G. elevator in town, received the first load of new wheat for this year, which was grown on the farm of Jules Egri some 18 miles north of town. The grain was the 22nd strain and weighed 62 lbs. per bushel.  
Several threshing rigs started up on Tuesday and the grain will no doubt start rolling in to keep all the elevator men "on their toes!"

## Gov't to Deal With Horse Disease

Provincial government is making plans to vaccinate every horse in Alberta next spring against the dread encephalomyelitis (horse brain disease), an official said last week, the Edmonton Journal reports.  
Municipalities are being asked to co-operate with the department in making this possible. It is thought that the disease will be worse next year if some means to combat the plague is not decided on now.

Report from Cranbrook said the B.C. government has outlined a similar program.  
Outbreak of encephalomyelitis is reported in the Peace River, according to reports reaching Edmonton.  
Report from Beaverleg said the plague had broken out. Shipments of vaccine have been ordered sent to the area.

## Will Reduce B.C. Gasoline Prices

Reduction of gasoline prices in British Columbia was forecast recently in a statement made by Premier Pattullo of that province.  
Through the appointment of a new director of fuel and other legislation it was intimated that a cut in prices was in sight. It is recalled that a substantial reduction in prices of lower grades was urged after an investigation was made by the Macdonald commission.  
This action in the coast province is expected to be reflected in Alberta where the Alberta Motor Association has been urging the need of lower fuel prices to motorists. Protests against prevailing prices were made in the legislature at the last session and an investigation by the government was requested.  
So far the provincial authorities have made no announcement as to what action will be taken to implement the request of the legislative assembly but it is believed that steps will be taken before long by a commission to check up prices and see just to what extent reductions would be warranted.

Janet Ellis  
Rising young vocalist on the World Broadcasting system when Vic Fraser's band entertains you through C.J.C.A.

## Final Balance Sheet of 1938 Celebration

The following synopsis shows the balance sheet presented to the final meeting of the Dominion Day celebration committee, and is one of which each member of the committee may be justly proud, and the citizens congratulate themselves upon.  
By gate receipts \$715.78  
By horse race entry fees 67.50  
By concession rentals 132.00  
By donations from business men 193.00  
\$1118.78

**DISBURSEMENTS**

To Prizes	
Parade	\$37.00
Baseball	55.00
Softball	102.00
Basketball	31.00
Horse races	261.00
To preparing grounds	117.23
To town band	100.00
Picnics	100.00
Children's treats	45.89
Incidentals—Umpires, balls, prtng, advtg. etc.	150.81

\$1032.84

Receipts over disbursements, \$85.94.  
As was ordered by the general committee at its closing meeting the cash balance of \$85.94 has been deposited in a trust fund in the Bank of Montreal.  
W. J. HUNTINGFORD, chairman.  
F. JOHNS, sec-treas.

On Friday last, pupils were writing supplementary exams in subjects in which they had failed at the June sittings. They were under the watchful eye of Rev. T. E. Armstrong, who sat as presiding examiner.

## Crop Report Gives Promise Nice Return

Although across the Prairie Province fairly general rains have lately caused delay in harvesting operations cutting in well advanced over most of Saskatchewan and southern Alberta and threshing has now become general in Manitoba. A period of warm, dry weather is now required, particularly in Alberta, to facilitate the harvesting of crops. In Manitoba, wheat yields will be fairly satisfactory and early marketings of rust-resistant wheat are grading well. In Saskatchewan crops show a wide variation and yields and grades have lowered as a result of rust and drought.  
In Alberta crops generally continue promising. Intermittent rains and lower temperatures during the past two weeks have generally delayed harvesting and retarded ripening of late grains. Slight red rust damage is reported in the northeast and east-central areas. Precipitation may have lowered grades. The pasture and feed situation is very satisfactory. There has been no damage from frost in Saskatchewan. While harvesting has been retarded by cool, wet weather, wheat cutting is now nearing completion in all but the central and west-central districts. Grasshoppers are still active and in the areas affected coarse grains are being cut for feed to prevent further damage.  
In Manitoba rust has reduced some yields but owing to the high percentage of rust-resistant wheat sown this year final returns on the whole will be fairly satisfactory.

## Totem Pole Golf Tourney at Jasper

Jasper Park Lodge. Many years have gone since there has been so much interest in the annual Totem Pole Golf Tournament played over this beautiful course each September. With approximately three more weeks to go, the reservations at the Lodge have reached 125, with Vancouver heading the list with 35 and Victoria and Seattle pressing closely. Winnipeg and other prairie cities will be well represented so that the prospects for a keen fight are very apparent.

"It looks like a very open battle this year," stated Robert Sommer, manager of the Lodge. "After checking up the previous record I find it is more likely that in the tournament this year than ever, judging by the early reservations. In previous years the reservations have come much later. One of the reasons, apparently, is that our summer business has been so heavy and word has been passed around on the excellent condition of the course, which never has played so true as it does now."

## Accident Victim Taken City Hosp.

We are informed that Mr. Arnold Eiden, the victim of a Highway accident near Phillips in July, who has lain unconscious so long in the Viking hospital, was taken to University hospital in Edmonton last week for expert observation. Although he was conscious for a few moments on Wednesday last his condition is still considered very critical indeed. His daughter, Ruth, who was with him and his wife in the accident, is still a patient at the Viking hospital.

## New C.N.R. Engines Rate 4,000 H.P.

Steam locomotives continue to increase in size, notwithstanding the development of rival forms of motive power. Railroads are really the backbone of a country's transportation system and all it needs to prove this is to watch the latest of these rolling along the rails at passenger train speeds or visit a busy railway freight terminal. Mechanical experts are constantly at work devising more economical and more powerful locomotives. The latest of these are the new steam locomotives being put into fast passenger train service by the Canadian National Railways on the "International Limited," "The Maple Leaf" and "Inter-City Limited" on the Montreal-Toronto-Chicago run. The new giants of the rail are numbered 6405 to 6410. Capable of developing 4,000 horsepower, they could move a train of 760 loaded freight cars, each of 50 tons, on the level at 10 miles an hour; could swing a train of 170 cars at 40 miles an hour on the same conditions; and pick up 100 loaded cars and run away with them at 60 miles an hour. The firebox, which can burn six tons of coal an hour, is about the size of a fair-sized den in a home, being 10 feet long by 7 feet wide and 10 feet in height. The locomotive is fired by an automatic stoker and even the whistle and bell are operated mechanically, an air valve taking the place of the old-time whistle cord and air pressure operating the bell ring. The eight driving wheels are each 6 feet 5 inches in diameter and the weight of the engine and tender in working order is 332 tons.

## Reduce License Fee For Trucks

Reduction of motor truck licenses will become effective in the province of Alberta on September 1st, instead of October 1st, according to advice previously given.  
Licenses taken out after September 1st will be 40 per cent. less than the annual charge, and will be good until March 31st, which is the end of the fiscal year.  
We are informed, also, from the local detachment of the R.C.M.P., that instructions have been issued to them that a close check-up is to be made on all truck drivers, in that a special license is required of them during the time they are engaged in the hauling of wheat. No doubt our readers would wish to know will pay attention to this provision.

## Minutes of Regular Meeting, Vale M.D.

### Avoiding Waste in Oil Development

The orderly development of the Turner Valley oil field has been one of the brightest spots in recent history of the oil industry.  
Discovery of a major oil field has frequently been followed by economic disorder, resulting in heavy loss and grievous waste.  
This happens because the new field has to find its market, a process which means displacement of previous sources of supply, and conditions of surplus which upset sound business practices.  
As soon as it was determined that there were large supplies of oil in Alberta, the major refineries stopped importing from Montana. They negotiated with the railways for a new freight rate schedule to allow Turner Valley crude to serve the entire prairie area.  
This permitted price reductions. This year these price cuts will mean a saving of \$5 million dollars to the prairie consumers on purchases of petroleum products.  
Mr. Jack Lewis, C.N. foreman here has now arrived home from his holidays spent with relatives in Kansas.

### Results of Coal Tests Reported

Fuel research engineers of the Department of Mines and Resources, Ottawa, reported marked progress in the past 15 years in the use of pulverized coal as a fuel in steam generating plants. More especially is the fact that the use of large central station plants.  
Present tendency, when electrical energy is generated in a steam turbine generator plant, is to construct steam generators and steam turbines on an almost gigantic scale in order that full advantage may be taken of the economies made possible by the most efficient use of the fuel, reduction in heat losses, and reduced cost per unit of power installed.  
For particularly large units the pulverized fuel fired generator appears to possess distinct advantages over other types, although mechanical stokers are now being used in many of the largest central station power plants. The choice between this type and the pulverized fuel fired type is dependent largely upon local conditions, the class and cost of fuel available, its suitability for the particular purpose, and the character of the load. Pulverized fuel fired boiler installations show the greatest advantage when the individual units are of large capacity and the steam load demand is several times the normal boiler rating. In Canada they find their widest application in pulp and paper industry, the largest industrial user of steam in the country.

### Propose Blood Tests For Drivers

Blood tests of all persons involved in traffic or other accidents to ascertain if any accident occurred by reason of such person being under the influence of alcohol or other narcotic drug" was urged in a resolution passed at the annual convention of the Association of Temperance Forces of Alberta, held in Edmonton some weeks ago.  
The temperance organization has sent a copy of the resolution to the Alberta Motor Association, in view of the campaign that the A.M.A. has carried on consistently for safer driving on Alberta highways.  
Resolution passed by the temperance organization has been sent to the dominion government, urging that the Criminal Code of Canada should be amended to provide for blood tests being taken of persons causing accidents.

### Reduce License Fee For Trucks

Reduction of motor truck licenses will become effective in the province of Alberta on September 1st, instead of October 1st, according to advice previously given.  
Licenses taken out after September 1st will be 40 per cent. less than the annual charge, and will be good until March 31st, which is the end of the fiscal year.  
We are informed, also, from the local detachment of the R.C.M.P., that instructions have been issued to them that a close check-up is to be made on all truck drivers, in that a special license is required of them during the time they are engaged in the hauling of wheat. No doubt our readers would wish to know will pay attention to this provision.

A regular meeting of the Council of the Municipal District of Vale, No. 392, held in the municipal office on Saturday, August 20th, all councilors being in attendance with Reeve Castle presiding.  
Moved by Coun. Currier—That the minutes of regular meeting held on July 23rd be adopted as read.—Carried.  
Moved by Coun. Treffer—That communication from Mr. H. R. L. Henry, private secretary of Rt. Hon. W. L. Mackenzie King, relative to the resolution of this council in connection with the pegging of the 1938 price on Canadian wheat, be received and ordered filed.—Carried.  
Moved by Coun. Nelson—That notice of admittance of Elita Skinner to the Royal Alexandra Hospital be received and Coun. Jerram appointed a committee to investigate the residence of this person and report back at next Council meeting.—Carried.  
Moved by Coun. Jerram—That notice of admittance of Elita Skinner to the Royal Alexandra Hospital be received and Coun. Jerram be again requested to furnish recreational leave on L.S. 2 Sec. 36-43-5, with, payment for same having been remitted by District in March of the present year.—Carried.  
Moved by Coun. Castle—That communication from Messrs. Patrin & Johnston, auditors of the municipal district, re cheques of Old Age Pensioners resident in the district, be received and that Secretary's reply to same be approved by Council.—Carried.

Moved by Coun. Currier—That letter from District Agriculturist, relative to Bull Exchange Policy of the Department, be kept on file for information of any interested ratepayer.—Carried.  
Moved by Coun. Treffer—That communication from Mr. A. Ellwood in connection with relief furnished the late Gilbert Ellwood be received and Secretary instructed to reply to same enclosing the enclosures made in this letter.—Carried.  
Moved by Coun. Nelson—That the following resolution, copy of which was received in circular letter from the Department bearing date of July 28th, 1938, be endorsed by Council: "The Council of the Municipal District of Vale, No. 392, requests assistance from the senior governments as they are not financially able to provide social services and as a condition to obtaining such assistance they agree to comply with the terms of this agreement as outlined herein"—Carried.

Moved by Coun. Jerram—That relief be extended to Helmer Tanager and Frank Clark for the month of August at a rate of \$7.00.—Carried.  
Moved by Coun. Castle—That relief be discontinued to the following persons as from August 31st—S. E. Bishop, H. Lawson and O. Lindgren.—Carried.  
Moved by Coun. Currier—That the following insurance premium on office safe be paid at this time in the sum of \$11.00.—Carried.  
Moved by Coun. Treffer—That the following pay sheets be approved by Council and ordered paid in their respective amounts—Div. 1, \$292.45; Div. 4, \$287.75.—Carried.  
Moved by Coun. Nelson—That the following correspondence be ordered filed: Dominion Dept. of Agriculture and the Provincial Bureau of Relief and Public Welfare.—Carried.  
Moved by Coun. Jerram—That the monthly statement for month ending July 31st be approved and filed with records of the District.—Carried.  
Moved by Coun. Currier—That the Secretary be appointed Collector and Bailiff of the Municipal District under the arrangement as agreed upon at this meeting.—Carried.  
Moved by Coun. Treffer—That correspondence from Mr. Wm. Hewlett, Collector Branch, Dept. of Municipal Affairs, be received and kept on file for future reference.—Carried.  
Moved by Coun. Jerram—That accounts totaling \$488.90 be ordered paid.—Carried.  
Moved by Coun. Nelson—That annual tax sale of District be held at the hour of 2 p.m. on Tuesday, November 15th, 1938.—Carried.  
The Assessor, Mr. B. C. Lees, gave a lengthy report to Council at this time in connection with his work throughout the district, the report apparently being received in a favorable manner.  
Moved by Coun. Treffer—That this meeting does now adjourn.—Carried.

This week sees the 1938 threshing season getting into promise and with a continuation of this splendid weather our farmer friends should soon be wearing "the smile that won't come off!"

## THEY ALSO FARM...

## ...WHO IN THE MACHINE SHOP WORK

Not for some time now could farming have been practised on the small scale style familiar in the world of yesterday.

If today we had to rely on the old-time cradle methods of cutting and garnering the crop, it would take every able-bodied man in every province of our Dominion to harvest the average wheat crop of Western Canada. Thanks, however, to modern farm machinery, with practically no seasonal increase in hired labor, the farmer is able to take care of even the heaviest of harvests. The making of the machines for harvesting is but a transference of labor from the field to the factory.

Instead of the short seasonal engagement during the rush days of harvest, the implement worker is given longer periods of employment, and the days he spends in making farm equipment lessens the number of men required in the farm field. Thus, these men, during the winter months, help make short work of garnering greater crops during the few and fleeting days of harvest season, and so many of the men thus engaged have themselves come from farm homes.

It was only natural when turning their faces city-wards, that men from the farm should first seek employment with a company whose name to them had been a household word.

In Massey-Harris, whose origin ninety years ago was on a farm, these one-time farmers find a rather logical expression for their abilities in the mechanical side of farming—for while in forge or machine shop—they also farm.

### SWIMMING AND

### BODY BUILDING

Increase in swimming ability during the past decade—in the last ten years the swimming public in America is estimated to have increased 450 per cent.—is not entirely prompted by life-saving desires. True, from a standpoint of human safety, a knowledge of swimming is most important; but aside from this, no other exercise approaches swimming for all-round development of the body.

This is brought out effectively in an article, "Learn How to Swim" in the Summer issue of "Health". It is contributed by John D. Devlin, Swimming Director of Central Y.M.C.A., Toronto, who says in part:

Swimming exercises the large fundamental muscles of the trunk and limbs. The leg kicks develop the lower back and abdomen muscles, along with the leg musculature. The arm strokes develop chest and upper back muscles. Muscles of respiration are expeditiously developed. ERTT are developed to an unusual degree. The upward lifting and stretching of the arms acts to lift and broaden the chest. Suppleness is promoted generally in all the joints and much is done to equalize the unbalanced muscle pull associated with poor posture. Swimming is one of the very few exercises that promotes a symmetrical development of the arms and legs, of antero-posterior posture, and of lateral symmetry. Swimming permits free and unobstructed movement, in the full range of joint action without sudden or violent jars, due to contact with apparatus or to the ground.

A fact of considerable importance to girls and women is that swimming is one exercise that does not develop the body in a way harmful to physical beauty. The muscular development associated with swimming is of

### CHECK YOUR ADDRESS LABEL

It will tell you how you stand in respect to your subscription to The Star. We do not relish the task of continually reminding our readers, but it becomes necessary.

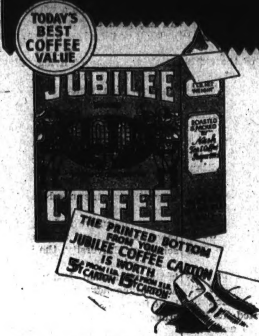

If you are in arrears the sum may seem insignificant to you, but to The Star a far different picture is presented. It is difficult to carry on these times, and hence it becomes necessary to remind our readers of their obligation. See our clubbing offer.

a smooth rounded type rather than characterized by extremely hard, knobby or knotted muscles. Flexibility in all the joints is promoted, which improves physical grace in general. Even an excessive amount of swimming will not make one scrawny and thus nor will it add a great deal of extra weight. Swimming as recreational exercise has been called a normalizer as far as its effect on body weight is concerned.

## FALL CARE OF PULLETS

The date at which birds will come  
into production in the fall will depend  
largely on the rate of hatch, rate of  
maturity for that particular strain of  
birds and on the system of feeding  
practised during brooding and rear-  
ing. In order to have the birds come  
into laying at a definite time in the  
fall, these factors must be given con-  
sideration. It has been the experience  
with Barred Plymouth Rocks, at the  
Dominion Experimental Station, at  
Kentville, N.S., states R. F. Cheney,  
Head Poultryman, that birds coming  
into laying between six and seven  
months of age give the best satisfac-  
tion from the standpoint of produc-  
tion, egg size and body weight. Birds  
coming into laying in less than six  
months are inclined to be small birds,  
laying small eggs, while birds requir-  
ing more than seven months are not  
as heavy producers though they show  
an increase in egg size. It is conse-  
quently not good policy to rush birds  
into production at four and one-half  
to five months of age by putting them  
onto laying mash at this age, but ra-  
ther to continue feeding a growing  
mash along with plenty of scratch  
grain until the birds are fully devel-  
oped.

When the first eggs are dropped on  
range all the more advanced pullets  
may be put into the laying houses,  
which should have been thoroughly  
cleaned and disinfected. The birds  
should be treated for lice by rubbing  
a small amount of mercury ointment  
and vaseline (equal parts) into the  
feathers below the vent, or by apply-  
ing nicotine sulphate on the roosts  
according to the instructions of the  
manufacturer. Growing mash grain,  
and ground limestone, or grit, and  
oyster shell, along with plenty of  
fresh water to drink, should be avail-  
able. Gradually shift from the grow-  
ing mash to the laying mash, once  
the birds are started on a laying  
mash mixture be sure to continue, us-  
ing the same mixture during the fall  
and winter months. A wet mash may  
be fed to assist the birds in putting  
on extra weight. Mix equal parts of  
laying mash and cornmeal with milk,  
giving the birds all they will clean  
up once a day during the first month  
in the laying house. The grain hop-  
pers should be left open one-half hour  
late in the afternoon or if hand feed-  
ing of grain is practised, allow two  
and one-half ounces of grain per  
bird. This should be started before  
the birds get into heavy production so  
that no further changes need be made  
in the feeding program.

It is important that a definite rou-  
tine of work be planned not only for  
the convenience of the operator but  
also for the purpose of obtaining the  
best results, as hens are very much  
creatures of habit and appreciate hav-  
ing their meals on time.

The feeding schedule used at this  
Station is: 7 a.m., milk or water to  
drink; 9 a.m., green feed—apples,  
mangels or sprouted oats; 11 a.m.,  
wet mash—5 pounds dry mash mixed  
with milk to 100 birds (dry mash  
hoppers closed); 1 p.m., water to  
drink; 3 p.m., dry mash hoppers open;  
4 to 5 p.m., grain hoppers open for 20  
to 30 minutes, time to open depending  
on daylight; small amount of grain  
thrown into litter to induce birds to  
turn over same and to avoid crowd-  
ing at hoppers.

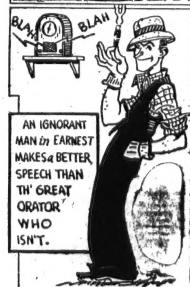

SOIL PHOSPHATE LOST  
IN SURFACE DRAINAGE

Few may realize that the flow of  
muddy water across fields and into  
ditches is a type of soil erosion and  
represents loss of fertility, says W. A.

skirt. The new mode in sleeves is  
evident here and you may be sure  
your youthful daughter will appreciate  
this up-to-the-minute chic.

For Pattern, send 15 cents in  
coin (for each pattern de-  
sire) your NAME, ADDRESS,  
STYLE NUMBER and SIZE  
to Patricia Dow, (Wainwright  
Star) Pattern Dept., 115 Fifth  
Avenue, Brooklyn, N.Y.

## JOE GILH

McKenzie, Ellis Chemist, Toronto.  
Indeed, the loss of phosphorus in this  
way may exceed the amount taken up  
by crops grown on the area.

Much of the phosphorus is con-  
tained in the top layer of soil, and  
phosphates are being drawn down-  
ward by plant roots from the lower  
levels and deposited near the surface.  
In the spring this top soil layer  
thaws out first. Spring rain churns  
up the small soil particles and holds  
them in suspension as it finds its way  
to drains and creeks. Now, these very  
fine clay particles contain a large  
part of the soil phosphate. While the  
surface soil of a field may have a clay  
content of only 5 or 6 per cent, this  
small fraction may hold over 50 per  
cent of the available phosphate, con-  
tained in that soil.

Again in autumn, after harvest,  
when no growing crops remain to  
utilize the available plant food from  
the soil, rains frequently are copious  
enough to cause a surface run-off  
which carries away the phosphate-  
bearing soil particles.

These facts bring a realization of  
what run-off water means. Let us  
see what happens to the phosphate  
added to the land in the form of fer-  
tilizers. Extensive studies of the  
subject have shown that not more  
than 30 per cent is used by the growing  
crop during the first year, and  
only a small portion of the phosphate  
is carried down to the lower soil lay-  
ers.

Since phosphate is not leached, as  
are nitrogen and, to a lesser extent,  
potash, it has been assumed that the  
phosphorus not assimilated by the  
crop accumulates in the soil, except  
perhaps on slopes where erosion is  
pronounced. Yet it is apparent that  
even on nearly flat lands, wherever  
muddy water runs, it carries off a  
quantity of valuable phosphate.

A preventive is the use of protec-  
tive winter cover crops which conserve  
phosphorus, other mineral elements  
and nitrogen, by storing them in their  
tissues, and prevent surface erosion.  
And the remedy is to apply frequently  
adequate amounts of well-balanced  
fertilizers high in available phosphate.

## The World of Wheat

H. G. L. Strange,  
Director, Research Department,  
Searle Grain Company, Ltd.

Thatcher, Renown and Apex, the  
new rust-resistant wheats, have been  
"tried in the fire and have not been  
found wanting".

This year most unfortunately a  
rust epidemic visited our Prairies, and  
many farmers who had to depend up-  
on varieties susceptible to rust, such  
as Marquis, Ceres, Reward, Garret  
and Red Bobs have suffered seri-  
ous losses with their crops both in  
yield and in grade.

MODERN  
WOMEN

CHARL ORMOND  
WILLIAMS  
President of National  
Federation of Business and  
Professional Women's Clubs, Inc.

Women of the western hemi-  
sphere are concerned about their  
representation at the Inter-Amer-  
ican Peace Conference to be held  
in July in Buenos Aires. They are  
especially interested in the possi-  
bility of the adoption or rejection of  
treaties framed at The Hague Con-  
ference nearly thirty years ago. Fe-  
minist leaders are requesting that  
women delegates be sent to the  
South American gathering. Their  
point is, that unless women sit in at  
the July convention, only one-half  
of the American population will be  
represented.

Two Japanese high school girls  
have written letters to pupils in the  
United States with the hope of es-  
tablishing friendship with their sis-  
ters here, and to give them a better  
understanding of Japan's ideas and  
attitudes. The letters, selected from 256  
written by students in the 900 high  
schools in Japan, are a part of the  
work for peace undertaken by the  
Women's Peace Association of Japan  
which Mrs. Tsune Gauntlett, pre-  
sident, Mrs. Gauntlett believes that  
the hope of peace lies with the  
youth of the world.

Women's clubs are an important  
factor in keeping motion picture  
clean. Max Knight told recently  
the nine women's organizations in  
Hollywood which sit in judgment  
on movie screen offerings. The nine  
represent a variety of interests and  
religious beliefs. Their unofficial  
representative in the film city is  
Mrs. Nathalie Bucknall.

A Women's Chamber of Com-  
merce has been organized in Tal-  
ledega, Alabama. This is probably  
the first of its kind. The president  
Mrs. J. W. Elliott, will start a cam-  
paign for civic improvement.

Miss Lillian D. Wald, president  
and founder of the Henry Street  
Settlement and the nursing service  
of that name, New York City, has  
been awarded the Lincoln Medal  
which is bestowed annually to the  
citizen who has rendered the great-  
est service to the City of New York.

## House of Hazards

By Mac. Arthur

"YOU KNEW MR. MAC SNIFF, OUR WESTERN  
REPRESENTATIVE, WHO HAS JUST BEEN MADE  
VICE-PRESIDENT OF THE FIRM, DIDN'T YOU?"

"I ALWAYS SAID  
I WAS RESPONSIBLE  
FOR HIS  
SUCCESS—"

"THAT'S FINE, WE'RE TAKING  
UP A COLLECTION FOR A  
GIFT TO GIVE HIM AND  
WE ARE ASKING ONLY  
HIS OLD FRIENDS TO  
DONATE"

"AH—EM—ERR—OF COURSE I  
HAVEN'T SEEN MR. MAC SNIFF FOR  
YEARS— I DOUBT IF HE'D EVEN  
REMEMBER ME— BUT, AH—  
NATURALLY, I APPRECIATE  
THE SPIRIT OF  
THE IDEA—"

The new rust-resistant varieties,  
however, have done well, for they  
have suffered little or no damage  
from the dread scourge.

Those farmers who were able this  
last spring to obtain sufficient seed  
to sow their entire fields to any one  
of these new varieties are fortunate;  
those who were not, however, will  
have the opportunity this coming  
year of obtaining their full require-  
ments of seed of any one of these rust-  
resistant varieties, for good seed will  
be plentiful and at a moderate cost.

Resistant to stem rust as these new  
varieties are, however, they can only  
be regarded as "stop gaps", to be re-  
placed as soon as our Canadian Plant  
Breeder are able to release for use  
some of the better rust-resistant  
strains which the Dominion Rust Re-  
search Laboratory now has in the  
making.

Following factors have tended to  
raise price: North China continues to  
buy Australian flour—Continued and  
United Kingdom purchasing U.S. Pa-  
cific wheat—Drought and heat lower-  
ing crop yields in southern Europe  
and Danubian countries—Germany  
buys United States corn—Severe  
drought causes wheat crop failure in  
Spain.

Following factors have tended to  
lower price: Poland announces export  
bounty on wheat—Increased wheat  
production in Japan—France imposes  
import duty on oat, barley and rye—  
Bumper grain crop indicated in Ger-  
many—Private Hungarian wheat ex-  
porters larger than official—Most im-  
porters confining purchase to imme-

diately skinned, nail polish with an  
orange tone is preferable. New  
shades such as rust or robin red  
have been created for women who  
remain tanned from outdoor sports  
the year around.

A new material to put under small  
rugs keeps them from sliding. It's a  
sort of mesh, and it clings to the  
floor so that the rug goes over it  
smoothly and can be vacuumed as  
usual. Good for houses where there  
are children.

Draperies that match the wall will  
make a room look more spacious.  
One of the most interesting ways  
of giving ivory walls a "difference"  
is by using draperies of just the  
same shade of ivory. A rather for-  
mal but stunning effect can be  
achieved with deep beige walls and  
deep beige draperies hung straight.  
The new vogue for grey can also  
be handled this way, but be sure  
you have plenty of clean contrast-  
ing colors in the room so that the  
effect won't be gloomy. Grey is  
smart and cheerful if it is used with  
fresh, bright colors.

The Family  
DOCTOR

By JOHN JOSEPH GAINES, M.D.

## Get Out in the Sunshine

In these bright spring and summer days, few people stop to think  
what wonderful values are for us in the warmth and light of the sun-  
rays. Science has it that possibly radium makes up a part of the sun's  
luminous body. Were it not for this great solar dynamo, humanity  
would fade from the earth like flowers cut from their stems.

Various "rays" have been isolated, resulting from an analysis of light  
in nature. The ultra-violet, an element of sunlight, is concentrated in  
apparatus used by the specialist. Perhaps the "infra-red" is the most  
valuable of the reproduced heat rays and it is within reach of the  
ordinary family. A red-hot iron liberates infra-red rays, valuable in  
treating all deep, inflammatory conditions.

Light heat is more beneficial in most conditions than dark heat, such  
as hot-packs, poultices, and hot-water bags. Light and heat together  
set the microscopic particles of tissue into rapid vibration. This serves  
to "scatter" violently congested areas, which may be painful to the  
point of agony. The infra-red ray is used almost daily in my office  
and with satisfactory results.

Then there is a difference in dry heat, as in lamp treatments—and in  
moist heat, as in hot water packs applied to the body. Light reaches  
deeper, and with more lasting effects. There is very little, even tem-  
porary, relief in hot wet packs. But all these methods are worth study  
in the family. They afford a means of relief outside of the realm of  
drugs.

## KEEPING A FREE PRESS

Honest, temperate and intelligent use of freedom is the surest guarantee of freedom. Yet even when not so used by all, freedom is still essential. Time and again that has been proved about freedom of the press, the most active form of that indispensable guardian of all liberty—free speech. It should be remembered in connection with the attack just made by Senator Minton on the American press.

He charges that the press is "the money of men who, in my opinion, would not scruple to throw this country into fascism rather than surrender their privileges." His implication is that greater government of the press must be adopted. There is not much immediate danger of drastic legislation for control of the American press. But there is danger that the sentiment for which the Senator speaks will move gradually in that direction—the people crippling a basic agency of freedom in their impatience with its abuse.

For it should be frankly said that large sections of the press are not ideally honest, temperate or intelligent in their use of a precious freedom. Following the 1936 election, publishers and editors said to each other many of the things Mr. Minton says. Recently William Allen White, after pointing out that publishing today usually requires quite a little capital, wrote:

"Capital is instinctively, for all the noble intentions of its capitalists, class conscious. . . . The owners of newspaper investments . . . feel a keen sense of financial responsibility, and pass along their anxiety to newspaper operatives. . . . The sense of property goes thrilling down the paper operatives. . . . The sense of property goes thrilling down the line. It produces a slant and a bias that in time become — unconsciously and probably in all honesty — a prejudice against any man or any thing or any cause that seriously affects the right title or interest of all other capital, however invested."

Of course, the tendency Mr. White notes is nobly resisted by many fine papers as is the other abuse he mentions—pandering to sensationalism. And in some measure publishers and editors are recognizing the danger to a free press from themselves and are striving to meet it. The public would be well to encourage this reform from within instead of backing any kind of government control.

For the press today has no such uniform bias as would be imposed by

government. There is enough diversity of viewpoint, enough freedom from class propaganda, enough freedom from monopoly publishing to make the press a corrective of itself. Also the radio—unless dominated by partisan governmental control—will be a check on the press. Once government dictated news and opinion there would be no check—and no guarantee of freedom.—Christian Science Monitor.

## BEWARE OF FIRES!

Prairie fires! Annually, thousands of dollars worth of farm property, grain fields and pastures are destroyed as a result of this plague, caused in many cases by careless cigarette smokers, improper farm lighting, live ashes from stoves, lack of fire guards, etc.

With harvest in full swing now and with countless acres of ripened grain lying in swaths or standing uncut in the fields, the utmost precaution should be taken when handling fire in any form. Prairie fires are easy to start. A warning issued by the insurance branch, Department of Natural Resources, states that fields in most parts of the province are as dry as tinder while growths along roadways are also dangerous. A smoldering ember from a pipe or cigarette, over-heated bearing on machinery, glowing matches, can soon wreak havoc. Fire guards should be placed around fields and homes, especially around old straw stacks one contemplates burning. Firing of stubble without a permit from the insurance branch is contrary to law, and can lead to criminal as well as civil action against offenders. Regulations re the lighting of stubble and prairie fires may be obtained from the department.

MAKING CANADA  
A Better Place in Which to Live

A Series of Letters from Distinguished Canadians on Vital Problems Affecting the Future Welfare of Canada

Specialty Written for Canadian Weekly Newspapers Association

## LETTER No. 20

Dear Sir:  
I am sensible of the very kind compliment in your request that I speak for the prairie editors on the problem on which you have challenged the interest of our country's leaders in the true mission of the Canadian Weekly Press.

I have read with keen interest, as I assume all of the weekly editors have, the views expressed by master minds in various departments of human activity by which we have been aided in knowing the place we ought to fill in the national fabric. I pass over the views expressed on varied phases of the social system and of plans and policies in respect thereof favored by varied classes of society concerned for the world's welfare as they conceive it. For, summing it all up, I am the more firmly convinced that, as years of hard and sometimes bitter experience has taught me, the community editor has lost sight of his true objective, who gives thought and effort toward advancing the theories plans and policies of others however worthy of respect they may be. His true mission is, as you have ably defined it, "to make Canada a better

land in which to live and work" and his point of attack is the community whose welfare is, or ought to be, most directly influenced by his weekly summary of news and views.

As he surveys the week's happenings around him, he will note with sorrow that disturbers are busy bent on exploiting regional, social and religious rivalries and differences. To do a good job of his chosen mission the rural editor will strive with pen and pencil to ally discussion and to promote harmony and the real community spirit. Where and when he ventures abroad in the panorama of human affairs, he should seek alliance with or interest in political parties or groups, centering his whole heart and talents on promotion of general understanding and appreciation of the wonderful privilege it is to be a citizen of Canada in these times of world confusion. Being in heart and action loyal to his country he will be jealously proud of Canada's place and influence in the great Commonwealth of British Nations, pledged to the furtherance and ultimate triumph of the democratic system of government.

But first, last and always, I am firmly convinced that the weekly editor makes his best contribution of service toward "making Canada a better place in which to live and work" by radiating harmony, respect for established institutions and sense of civic obligation in his own community. If we make a good job of it the heaven will work in our neighbor towns and ultimately contribute toward that much-sought harmony in relations of the provinces, for lack of which the evolution of a truly national consciousness still tarries in the realms of fancy.

Yours sincerely,  
DONALD C. DUNBAR,  
Editor Estevan (Sask.) Mercury.

Having recovered from his recent accident Mr. Joe Richardson returned to his work in the C.N. yards last week end.

The structure of the new school is now rapidly taking form, and the workmen are rushing things to have it ready as early as possible.

Mr. Ed Patterson, of Greenhills, started threshing on Tuesday with his new John Deere machine from the Lou Tury warehouse.

Private Greeting Christmas Cards will be obtainable again this season at The Star office. We have the sample book now on display and all our cards are this year's printing. The prices are lower, too. Phone 1233 and we will arrange to call at your home so that you may make an early selection.

Mr. Roy Donnelly, of Edmonton, arrived last week end and is now installed in his new position as service mechanic at the Bowerman garage. He was formerly with General Motors in the city.

Mr. and Mrs. W. A. Knowles left at the week end to attend the big Canadian National exhibition at Toronto. Mr. and Mrs. T. Lane leave for the same point tomorrow (Thursday).

Mr. Robt. Ireland who was spending his annual vacation with his parents at Medicine Hat, has now returned to his duties as teller at the bank.

## Here's How Hot Summer Sun Will Heat Homes

This Twenty Year "Heat Map" Shows Where Home Insulation Against Summer Sun Will Be Most Needed

Here's how hot the exterior of your home will probably get during the month of August. And that may mean hot, sticky interior in the daytime and uncomfortable, sleepless night—unless your home is properly insulated against the summer sun's burning rays. The map is based on 20-year averages compiled by 600 recording stations of the United States Weather Bureau. Nine-tenths of the country, it shows, will have peak daytime temperatures of 80 to 110 degrees, and a good 25 percent of the country will average 95 degrees during the month.

But no part of the country will escape the August sun. Even roofs in northern Minnesota and Maine will heat up to 100 degrees or more, radiating this super-hot into the rooms below, until walls, ceilings and furniture become charged with it. That is why uninsulated houses become so unbearable during a hot summer—for every square foot of outside wall and roof is storing up heat, and releasing it slowly and continuously into every room, both day and night. Like a giant radiator, the ceiling throws off its excess heat in a dual ray that is absorbed by all objects in their paths. That is why a person frequently feels warmer lying down in bed than when standing, for a prone body offers a greater horizontal area to absorb these radiated heat rays. When standing, however, only head and shoulders absorb these rays.

But radiant heat is not the only cause of excessively hot houses. Sun heat, passing through unshaded walls like water through a sieve, warms the still interior air until it is frequently many degrees warmer than outdoors. The discomfort caused by this dead, overheated air might easily be avoided by proper insulation installed in side walls and second floor ceiling. But insulation performs a dual function, for it not only prevents the passage of heat from the outside in during the summer, but also prevents its passage from the inside out during the winter, making for substantial fuel savings that are frequently equivalent to 25 per cent of the normal cost of fuel.

## AMONG THE OLD-TIMERS

### "REMINISCENCES OF OLD DAYS"

#### TEN YEARS AGO

Work commenced last week on the new Sydenham school which is being built to replace the one destroyed by fire.

Mr. Harold Horsley brought in a beautiful specimen of horticulture—seven separate and distinct sweet pea blossoms on one spike.

A quiet wedding took place in town on Monday morning when Miss Laura Faye Babcock, of Fabian, became the bride of Mr. Alan Richard McLaine, of Waseca, Sask. Rev. D. Campbell, of St. Andrew's (Pres.) church officiated. The young couple left for a short motor trip after which they will reside on the groom's farm.

Mr. Alex Murray is having a new barn built on his property in the Greenhills district.

On his occasion of leaving town to work in Chauvin, Mr. E. Gehring was the recipient of a lodge emblem in the form of an elk's tooth suitably mounted, by his brother members of the Elks lodge.

Miss Jessie Sutherland, of the telephone staff, underwent an operation for appendicitis during the past week.

Mr. T. Rawn has had a garage built at the rear of his property on Second avenue.

Mr. P. Wilkins has returned from a pleasant holiday spent in Turner Valley.

Mr. and Mrs. Alf Chesterman, who formerly farmed in the Hope Valley district, have arrived in town to live. They have been residing in California for the past several years.

The Dupre garage has been improved by the laying of a full-sized concrete floor.

Miss Nellie Carroll, accompanied by her brother Jack, has returned from a pleasant motor trip to Mountain Park.

Front which visited the district on Wednesday night put the finishing touches on the beautiful gardens in town.

Mrs. A. Robinson and her son Jim have now moved into their new home on Fourth avenue.

After a pleasant holiday spent with her sister in Turner Valley, Miss E. Kemp has returned to her duties in the Post Office.

#### SYDENHAM

The funeral of Mrs. J. Ruste, which was held last Sunday, was well attended from this district.

Mrs. Gordon Carl spent the week visiting with her parents.

Mrs. M. Paxon spent the week-end with her sister, Mrs. G. Haire.

Miss Jean Dixon spent the past week at the home of Miss Ruth Ruste.

Miss Helen Frailek is a patient at the local hospital. We wish her a speedy recovery.

Allan Trayer left on the early morning train on Saturday for his home in Vancouver, after spending several weeks at the home of his relatives, Mr. and Mrs. C. M. Alexander.

These fine warm days are very welcome to the farmers for ripening late crops.

Mr. and Mrs. C. M. Alexander, accompanied by Mrs. G. Carl, spent a day at Vermilion on Tuesday.

Mrs. Bottaro entertained a few of her friends at tea on Thursday.

#### Sheepskin Flats

Master Walter McLean is spending a few days with his Uncle John.

Miss Mary Teeter is spending the remainder of her holidays visiting at the home of Mrs. Templeton.

School is to open in this district on September 6th at 9 a.m. sharp with Miss Murray in charge.

Mr. Campbell Templeton returned to his home for a few days.

Mr. Wm. Smithson spent the past week at the Templeton home.

Mr. P. Powell has returned to his home to cut his crop.

Congratulations are extended to Miss Maggie Wilkinson, who passed her grade IX examinations with an "A".

Mr. J. Egrie and A. Rasmussen have started up their threshing machine.

The general horse disease has not altogether died down—there is one more case reported in the Valley.

Mrs. Arnold Harden was a tripper to Viking and Edmonton last week to accompany her husband there.

#### TWENTY YEARS AGO

Miss Mary Fish has returned home after a visit spent with her grandparents in Rumsey, Alta.

Dr. and Mrs. J. W. McQueen have given up residence in town and moved to Calgary. Dr. McQueen recently sold out his dental practice to Dr. H. H. Lockwood.

The Edgerton Pharmacy has opened a new department in their store. They have put in a large stock of the latest fiction and are going to conduct a circulating library.

What might have been a different tale was reported last week. An auto filled with children going to school and driven by Helen Aykroyd, turned a complete somersault. The accident was caused by the breaking of the radius rod in the steering gear. Fortunately no one was hurt.

Dr. H. H. Lockwood has rented the Lally residence and has made preparations for the arrival of his family from the States.

#### North Edgerton

First threshing of the season started last Friday when Mr. S. Strayer's outfit started up.

We notice Mr. Strayer is receiving No. 1 for this new wheat. Most of the outfits will be going strong by the middle of this week.

We hear that the wheat crop of Mr. Reynolds is tying up at the rate of 4 1/2 lbs. of twine to the acre. We hope it's not all straw.

Now with the busy harvest season in full swing, I'm afraid news is going to be hard to get till after threshing is over, but we'll do our best.

#### HEATH

Mrs. Morton Herbert and sons are visiting with Mrs. Herbert, Sr.

Heath school is re-opening on September 1st when Mrs. Stronach, of Kinross, will be in charge.

St. Patrick's W.A. have postponed their meeting for this month on account of harvesting operations. The meeting will be held on the regular date next month.

Miss June Sportnitz is home again. Mrs. Earle Stafford and family, of Seattle, were visiting their sister, Mrs. C. A. Dixon, at week end. Mr. and Mrs. Carl Stafford and son were also down from their home at Viking.

#### GREENSHIELDS

The first new wheat threshed in this district was delivered to the Alberta Pool Elevators by Mr. R. H. Valieu Saturday, Aug. 27.

Miss Laura Carl is visiting the McLure family at Loughed this week.

Mr. and Mrs. C. R. Pearson and Miss Gwen, of Camrose, were visitors at the Morrison home Thursday and on Friday they returned, taking Mr. and Mrs. Morrison with them for a few days holiday.

Anyone looking for Alberta license plate No. 50-567 will find it at Alex Murray's.

#### "U" AND "I"

When we separate the word "business" into its component letters, B-U-S-I-N-E-S-S, we find that "U" and "I" are in it. In fact, if "U" and "I" were not in "business" it would not be business. Therefore, if business is to remain "business", we must keep "U" and "I" in it.

Furthermore, we discover that "U" comes before "I" in business and the "I" is silent—it is to be seen, not heard. Also, the "U" in business has the sound of "I", which indicates it is an amalgamation of the interest of "U" and "I" and that when they are properly amalgamated, business becomes harmonious and altogether profitable—Bee Lines.

High-school Principal M. Meade is completing his holiday with relatives at Edgerton for the balance of the summer vacation.

Miss H. Adams, of the hospital staff, who has been spending her vacation at Loughed, has now returned to her duties here.

### SPECIAL PIANO CLASSES

ST. JOSEPH'S ACADEMY

beginning  
September 14

Tuition: 25c a lesson per pupil  
Parents interested should make early application

## DECORATING GLASSWARE

Bottles and decorated tumblers are now being made with colored labels and designs which will last as long as the glass itself. The chemist has developed a ceramic coloring material which is stencilled onto the glassware and put through a baking process, where it is incorporated with the glass so firmly that even a sharp metal instrument cannot mar the finish.

## ABOUT PEOPLE

Miss Irene Herman, of Camrose, was a guest of Miss Essie Bowerman last week for a few days.

Mr. and Mrs. John Mitchell, who have been holidaying here, returned to their home at Lavooy on Tuesday.

All members are asked to note that the regular meetings of Adeline Rebekah lodge, I.O.O.F., will resume tomorrow (Thursday) evening following the summer vacation period.

We learn a barred Plymouth Rock pullet owned by Mrs. R. L. Carey, north of Heath, laid a first egg at the age of three months and five days. Quite a busy little bird, we'd say!

Guy Tory sold a rubber-tired Hart-Parr tractor to Mr. B. Oldham, of Fabian, last week, this being the second machine of this make which Ben has purchased this year.

Government buildings in town have been in the hands of the painters during the past week, having a renovation in appearance.

The "sad separator" still holds their attraction for several of our town-folk, for although most of the regular Clear Lake campers have quit camping, owing to the previous disappointing weather, quite a number still take advantage of a few hours' enjoyment of the balmy breezes there at mid-week and week-end trips.

Mr. Frank McLeod and Mr. Charlie Horn have both joined the "summer squad" for a few days owing to the absence of their good help-mates on visits to friends.

All parents and guardians are reminded in an advertisement on page four to arrange for their children to register at the opening of school on Tuesday morning next, and thus assist the teaching staff to set up their grades and classes for the coming term.

It sure pays to advertise! Lou Tury reports the sale of two separators which he advertised in The Star last week!

Dr. and Mrs. J. Middlemass were away for a few days last week on a visit to their daughter, Mrs. Orin at Warburg.

Mr. Dave Ratray purchased a new John Deere separator from the L. Tury agency last week.

To mark the 10th anniversary of the introduction of the Latin alphabet, Turkey is issuing a special series of stamps.

New streamlined locomotives in Russia resemble Zeppelins on wheels.

\*\*\*The Atlas Lumber Company are unloading a carload of coast fir granary lumber this week. See Joe Welch.

## Just to Make You Laugh

### NOBLE PURPOSE

Mrs. Jenkins had missed Mrs. Brady from her accustomed haunts, and went in search of her. "They tell me you are working 'ard night and morning, Sarah Ann!" "Yes," replied Mrs. Brady. "I am under bond to keep the peace for pullin' locks of hair out of that lazy husband of mine and the magistrate said if I came afore him again or lay me 'ands on the man he'd fine me forty shillings." "And you are working hard to keep out of mischief?" "I'm what? I'm working 'ard to save up the fine!"

A grocer said to a youth in his shop, "I hear you folks are going to New Zealand shortly. Are you going to settle there?" "Er, well, I don't expect so," said the boy. "I fancy we'll keep on having the things charged, the same as here."

### THE REASON

"Yes, I had a beard like yours once and when I realized how it made me look I cut it off."

"Well, I had a face like yours once and when I realized I couldn't cut it off, I grew a beard."

Visitor: "Those are nice dressing rooms you have attached to the football stadium."

Prof.: "Dressing rooms? Why man, those are the college buildings."

WELL, REALLY!

"Hello, is this the city bridge department?"

"Yes. What can I do for you?"

"How many points do you get for a little slant?"

DESERVED IT

As the singer guest rose to leave the hostess said: "Pray, don't go yet, Mr. Basso; I want you to sing something for me."

"Oh, you must excuse me; it is very late and I should disturb the neighbors."

"Never mind the neighbors; they poisoned our dog yesterday."

Too bad, dear, that romance is over so soon—

Though it does not exactly concern us.

It is touching to think that the brides of last June

Are now shovelling coal in the furnace.

### WHAT ARE THEY THINKING ABOUT?

## BRUCE BARTON Says

### The Race Is Long

Just because we have made so much scientific progress and invented so many useful gadgets, we like to think that human intelligence has made tremendous progress in the past few hundred years. But has it?

Plato, born 2365 years ago, said: "A good state of affairs with reference to laws is divided under three heads: First, the laws must be good; second, the citizens must obey them; third, when having no laws governing certain conditions, men are good citizens if they act in accordance with what is just and reasonable."

Chilo, another of the wise men of Greece, laid down these principles of conduct: "To make good use of one's leisure; to rule the tongue, especially at a banquet; to refrain from speaking ill of one's neighbors; to be more prompt to go to one's friends in adversity than in prosperity."

Measured by the wisdom of the Greeks, or the Egyptians, or the prophets of the Old Testament, we would be held inclined to claim any evidence of intellectual progress. If this seems like a discouraging statement, then consider the other side of it. The best scientific guess puts the age of the earth at somewhere between three billion and five billion years. The beginning of the human race, according to similar guess, goes back only about a hundred million years.

Of the hundred billion years which man has enjoyed, more than nine hundred thousand were used up before he had developed intelligence enough even to sharpen a stone and scratch a record of his existence. All real achievement has taken place in the last one hundred thousand years, most of it in the past ten thousand.

We speak of the race as old; it is actually absurdly young. Its course is not a sprint but a marathon, of which only the first few inches have been run.

### Women and Children First

Mighty Hector, the Trojan commander-in-chief, was slain in the war that brought the downfall of Troy. In the days of the Caesars the generals fought hand-to-hand; there was no sitting back in comfort, no waiting in marble halls for bulletins from the front.

While the Battle of Hastings was in progress a report went around that Duke William, the Norman invader, had been killed. His soldiers began to fall back in disorder and terror. But William, taking off his helmet so that all might recognize him, called upon his men to return to the fray. He didn't say, "Go back to it," he said, "Come back."

Harold, the English king, was killed in that battle. Even as late as our Civil War some of the generals died on the battlefields, and others lost arms or legs. Stars upon shoulder-straps were no guarantee of safety.

We have come a long way from that. The dangers of war and the commanders of armies are no longer exposed to danger. Their headquarters must be bomb-proof. They are far removed from the scene of action.

The next forward step toward logical warfare should be affected through the arrangements of the front lines. The front lines may be kept out of danger zones. Also, non-commissioned officers and common soldiers should not take dangerous chances.

Let civilians, especially women and children, bear the brunt of battle. Drop bombs on them, and thus confound the enemy by cutting off his supplies of bandages, knitted socks, and other necessities.

When this procedure becomes general, mothers, wives, and children instead of suffering the horrors of war and for long periods will have them over quickly and permanently. Events are moving in this direction. War is no longer a valorous business wherein men battle hand-to-hand. The killing continues; those killed first are women and children. The valor and the glory are gone.

## "The Kidnap Murder Case"

by S. S. Van Dine

"I'm beginning to see what you mean, Vance," said Markham, old dear. "If it had been Kaspar, old dear, I would have heard at six o'clock he would have had time, before he scooped off at his wife's knicker, to collect his comb and toothbrush and pajamas. Why should the chap have taken them, in the first place? True, they are things he could well make use of on his hypothetical jaunt for the purpose of getting hold of brother Kenyon's lure, but why should he go to that trouble on so vital and all-important a venture—the toilet articles would be far too trivial and could easily be bought wherever he was going, if he was finicky about such details."

"Carry on the supposition a bit further, he would have realized that the absence of these necessary articles would be highly suspicious and would point too obviously to the impression he would have wished to avoid—namely, his own wilful participation in the attempt to extort the fifty thousand dollars. I'd say, y' know, that these items for the gentleman's toilet were collected and taken away—in order to give just this impression—by the soft-footed personage whom Mrs. Kenting... No, no, Markham. The comb and the toothbrush are only textual details."

"Well, what do you think happened?" Markham asked in a subdued, worried tone.

"Really, I don't know," Vance studied the tip of his cigarette with concern. "We do know, however, that Kaspar had an engagement last night that kept him out until three this morning; and that upon his return here he telephoned to the parlour, and then changed to street clothes. It might therefore be assumed that he made some appointment to be kept between three and six and saw no necessity of going to bed in the interval. This would also account for the sudden change of his attire; and it is highly possible he went quietly out through the front door when he fared forth to keep his early-morning rendezvous."

"OH MA—TUBBY SAYS I CAN'T COOK, I CAN FRY EGGS NBACON AND MAKE COFFEE, CAN'T I?"

## PICOBAC

PIPE TOBACCO FOR A MILD, COOL SMOKE

prodigious powers on first?" "My word, such flattery!" exclaimed Vance. "I haven't a single prodigious power—Y'm, a mere broken reed. But I simply can't bear not to inspect that ladder."

We followed the Sergeant through the ponderous front door, down the stone steps, and across the flagstones. "Don't come too close," he admonished us with a solemn air. "There are footprints at the bottom of the ladder and we gotta save 'em for Cap Jermyn's plaster cast."

"Well, well," smiled Vance. "Maybe you'll permit me to come as near as Captain Jermyn will have to go to perform his sculpture?"

"Sure," Heath grinned. "Look at this one, Mr. Vance," and the Sergeant pointed to an impression in the border of the hedge within a foot of where the ladder stood.

"My word!" exclaimed Vance. "Again thinking out his monologue he adjured it carefully and, kneeling on the lawn, inspected the imprint."

"You know, sir, we was lucky," Heath asserted. "It drizzled most of yesterday afternoon, and around about eight o'clock last night it got to raining pretty hard, though it did clear up before midnight."

Vance's entire interest seemed to be centered on the footprint. At length he murmured without turning: "Rather small footprint here—what?"

"I'll say it is," agreed Heath. "Might be a dame. And at a point like it was made with flat slippers of some kind. There's no heel mark."

"No, no heel mark," agreed Vance abstractedly.

"But really, y' know, I shouldn't say the print was made by a slipper—unless, of course, you wish to call a sandal a slipper."

"Is that it, Mr. Vance?" The Sergeant was half contemptuous and half interested.

"Yes, yes; rather plain," Vance returned in a low voice. "Not an ordinary sandal, either. A Chinese sandal I'd say. Slightly turned-up tip."

"A Chinese sandal?"

"More than likely, don't y' know."

"I suppose you'll be telling us next that this whole case is just another Tong war," Heath evidently did not deem Vance's conclusion worthy of serious consideration.

Vance stepped past Heath and grasped the ladder with both hands. "Look out, sir," cautioned Heath angrily. "You'll make finger-prints on that ladder."

Vance relaxed his hold on the ladder momentarily and turned to Heath with an amused smile.

"If I let go I give Dubois and Belamy something to work on," he said lightly. "I fear there are other finger-prints on this irrelevant exhibit. And it will be rather difficult to pin the crime on me. I've an unimpeachable alibi. Sittin' at home with Van Dine here, and readin' a bedtime story from Boccaccio."

Heath was spitting. Before he could answer, Vance turned, grasped the ladder again, and lifted it so that its base was clear of the ground. Then he set it down several inches to the right.

Before the Sergeant could protest Vance had thrown his cigarette carelessly away and was moving quickly up the ladder, rung by rung. When he was about three-quarters of the way up he stopped and made his way down.

Again he lifted the ladder and moved it still farther to the right. Then he came down, time on his knees and inspected the new imprints which the two uprights of the ladder had made in the ground.

"Sergeant," Vance told him seriously, "the imprints I just made when I mounted the ladder are of practically the same depth as the imprints made by the ladder last night. Do you see the significance of the results of that little test of mine?"

"It means several other things. And don't stew so horribly about your beloved hypothetical finger-prints. Imprints it means that two men were not on the ladder at the same time last night—or, rather, this morning. It means that whoever was on the ladder was a very slight person who could not have weighed over 120 or 130 pounds. Thirdly, it means that Mr. Kaspar, Kenting was not kidnapped by a very slight person."

"The findings, as it were," continued Vance, "taken in connection with the footprint, seem to tell us that a Chinese gentleman of small stature was the only person who used this ladder. Pure supposition, of course, Sergeant; but I rather opine that—"

"Yes, yes," Markham interrupted. "You see some connection between these footprints and the more-or-less Chinese signature on that ransom note?"

"Oh, quite—quite," agreed Vance. "As Vance separated the foliage still farther I saw a silver-backed dressing comb wedged between two closely-forked branches of the privet."

"You think that's Kaspar Kenting's missing comb?" asked Markham quickly.

"It could be, of course," nodded Vance. "What do you think about it?"

"Oh, I'm not thinking," Markham said. Vance started toward the gate. "I'm utterly exhausted. Let's stagger back into the Kenting domicile."

As we entered the front door Mrs. Kenting, Kenyon Kenting and Fiebel were just descending the stairs.

Vance approached them and asked, "Do any of you happen to know anything about that ladder in the yard?"

"I never saw it before this morning," Mrs. Kenting answered slowly in a deadened voice.

"Nor I," added her brother-in-law. "You're quite sure, Mrs. Kenting; pursued Vance. "The ladder doesn't belong here."

"I'm quite sure it doesn't belong here," she said in the same muffled tone of voice.

"Most curious," murmured Vance. "He reached in his pocket, brought out the comb he had found in the privet hedge, and held it out to the woman."

"By the way, Mrs. Kenting, is this, by any chance, your husband's comb?"

"Yes, yes!" she exclaimed almost inaudibly. "That's Kaspar's comb. Where did you find it, Mr. Vance—and what does it mean?"

"I found it in the privet hedge just beneath his window," Vance told her. "But I don't know yet what it means, Mrs. Kenting."

Before the woman could ask further questions Vance turned quickly to Kenyon Kenting and said: "We should like to have a chat with you, Mr. Kenting. Where can we go?"

The man looked around as if slightly dazed and undecided. "I think the den might be the best place," he said.

Kenyon Kenting followed us into the den, closing the door, stepped to a large leather armchair and sat down uneasily.

"I will be very glad to tell you anything I know," he assured us. Then he added, "But I'm afraid I can be of little help."

"That, of course, remains to be seen," murmured Vance. "First of all, we wish to know just what the financial arrangement is between you and your brother. I understand that when your father died the estate was all left at your disposal, and that whatever money Kaspar Kenting should receive would be subject to your discretion."

"That is quite right. Fiebel, how-

ever, was appointed the custodian, so to speak, of the estate. And I wish to assure you that not only have I maintained this house for Kaspar, but have given him even more money than I thought was good for him."

"When was the last time you saw your brother?"

"And did your brother bring up the subject of finances on Monday?"

## Hints for the Household

Conducted By Betty Barclay

### THE GREEN TINGE MYSTERY

What is ripe when it is green? Certain plums and apples are. Everyone knows that.

But how about the orange? At this particular season housewives should know that a California Valencia orange with a green tinge is by no means an immature piece of fruit.

The tinge is only skin-deep. Many times this particular orange is better colored in December, when immature, than in the following August when it is fully ripe.

Though it may revert outwardly to the color of immature fruit, when cut a Valencia orange at this season is richly colored, sweet and full of juice.

The green tinge peculiar to many summer Valencia develops after the fruit is fully ripened in May or June, starts at the stem end and gradually spreads over most of the skin surface. Why or how this change occurs remains one of Nature's secrets—the green tinge of mystery.

**ENGLISH LEMON CHEESE**  
4 eggs, well beaten  
2 cups sugar  
½ cup Sunblast lemon juice  
¼ cup butter

Cook over hot water until thick. Pour into sterilized glasses. Use for filling for tarts or cakes or as a spread for toast and hot biscuits.

Also known as lemon curd or lemon butter. (Makes 2-3 glasses).

**A GOOD-TO-LOOK-AT AND DELICIOUS-TO-EAT CAKE**  
This refrigerator cake is not only good to look at—it's delicious to taste and easy to make, as well. The rich, fruity flavor and glowing color of golden glow cake make it especially suitable for fall parties.

Use three layers of your favorite sponge cake as the foundation for this delightful dessert and complete your cake with this fruit filling.

**APRICOT FILLING FOR GOLDEN GLOW CAKE**  
1 cup sugar  
1-3 cup salt  
2 egg yolks  
1 cup apricot juice  
½ cup water  
2 tablespoons gelatin softened  
¼ cup cold water  
1 cup apricot pulp  
1 teaspoon almond extract  
2 egg whites  
¼ cup sugar

Apricot halves for garnishing. Mix 1 cup sugar, the flour and salt together. Blend in the beaten egg yolks. Stir in apricot juice and ½ cup water, and cook in double boiler until thick and smooth, stirring constantly. Add the softened gelatin.

Fold in apricot pulp and extract and cool until the mixture thickens slightly. Beat egg whites until stiff, and beat in remaining ½ cup of sugar. Fold into the first mixture.

Spread between layers of cake and frost top and sides. Garnish with apricot halves, for serving.

If you're looking for something different to serve the next time the Club gathers for a bit of sewing or bridge, try this zesty and refreshing drink, rich with the flavor of purple grapes, and the sharp tang of grapefruit.

**ROYAL PURPLE PUNCH**  
1 cup grapefruit juice  
½ cup grape juice  
2 tablespoons honey  
1 tablespoon sugar  
Ice cubes

Mix the ingredients thoroughly. Fill tall glasses with ice cubes, pour in the fruit juices, and serve at once. This makes four large glasses of punch. The beverage is equally good when fresh berry juice is substituted for the grape juice.

Royal Purple Punch, served with cookies, not-too-fancy cakes, or sandwiches, makes a simple, delicious, satisfying lunch for afternoon or evening party refreshments.

ever, was appointed the custodian, so to speak, of the estate. And I wish to assure you that not only have I maintained this house for Kaspar, but have given him even more money than I thought was good for him."

"When was the last time you saw your brother?"

"And did your brother bring up the subject of finances on Monday?"

Continued Next Issue

royal, "the imprints I just made when I mounted the ladder are of practically the same depth as the imprints made by the ladder last night. Do you see the significance of the results of that little test of mine?"

"It means several other things. And don't stew so horribly about your beloved hypothetical finger-prints. Imprints it means that two men were not on the ladder at the same time last night—or, rather, this morning. It means that whoever was on the ladder was a very slight person who could not have weighed over 120 or 130 pounds. Thirdly, it means that Mr. Kaspar, Kenting was not kidnapped by a very slight person."

"The findings, as it were," continued Vance, "taken in connection with the footprint, seem to tell us that a Chinese gentleman of small stature was the only person who used this ladder. Pure supposition, of course, Sergeant; but I rather opine that—"

"Yes, yes," Markham interrupted. "You see some connection between these footprints and the more-or-less Chinese signature on that ransom note?"

"Oh, quite—quite," agreed Vance. "As Vance separated the foliage still farther I saw a silver-backed dressing comb wedged between two closely-forked branches of the privet."

"You think that's Kaspar Kenting's missing comb?" asked Markham quickly.

"It could be, of course," nodded Vance. "What do you think about it?"

"Oh, I'm not thinking," Markham said. Vance started toward the gate. "I'm utterly exhausted. Let's stagger back into the Kenting domicile."

As we entered the front door Mrs. Kenting, Kenyon Kenting and Fiebel were just descending the stairs.

Vance approached them and asked, "Do any of you happen to know anything about that ladder in the yard?"

"I never saw it before this morning," Mrs. Kenting answered slowly in a deadened voice.

"Nor I," added her brother-in-law. "You're quite sure, Mrs. Kenting; pursued Vance. "The ladder doesn't belong here."

"I'm quite sure it doesn't belong here," she said in the same muffled tone of voice.

"Most curious," murmured Vance. "He reached in his pocket, brought out the comb he had found in the privet hedge, and held it out to the woman."

"By the way, Mrs. Kenting, is this, by any chance, your husband's comb?"

"Yes, yes!" she exclaimed almost inaudibly. "That's Kaspar's comb. Where did you find it, Mr. Vance—and what does it mean?"

"I found it in the privet hedge just beneath his window," Vance told her. "But I don't know yet what it means, Mrs. Kenting."

Before the woman could ask further questions Vance turned quickly to Kenyon Kenting and said: "We should like to have a chat with you, Mr. Kenting. Where can we go?"

The man looked around as if slightly dazed and undecided. "I think the den might be the best place," he said.

Kenyon Kenting followed us into the den, closing the door, stepped to a large leather armchair and sat down uneasily.

"I will be very glad to tell you anything I know," he assured us. Then he added, "But I'm afraid I can be of little help."

"That, of course, remains to be seen," murmured Vance. "First of all, we wish to know just what the financial arrangement is between you and your brother. I understand that when your father died the estate was all left at your disposal, and that whatever money Kaspar Kenting should receive would be subject to your discretion."

"That is quite right. Fiebel, how-

ries for a garnish. Make rennet-custard according to directions on package. Pour at once over blueberries. Let set until firm—about 10 minutes. Then chill in refrigerator. Garnish rennet-custards with the remaining blueberries.

## NEWS & VIEWS OF TOWN AND DISTRICT

NEXT MONDAY BEING LABOR DAY AND A STATUTORY HOLIDAY, ALL STORES AND OFFICES WILL BE CLOSED. This will be the last long week-end holiday this year.

The Searle Grain Co. are making repairs on their elevator at Fabyan these days.

Mr. Steve Dowerman was in the city this week to attend the General Motors Dealers' convention there. He is bringing back a new G.M. truck for Percy Wolf, of Edgerton.

Let the Editor harvest HIS crop, too. Drop in with your subscription if it is due and unpaid. Thanks!

We are glad to learn that Mrs. N. S. Kenney, who underwent an operation at Bentley while on a visit to her son Gordon there, is now recovering nicely.

Dr. Springbett and Mr. L. Baxter attended the rugby game in Edmonton at the official opening of the new stadium there on Saturday.

Mrs. Reg. Bryan and little daughter, who have been spending a vacation at the coast, returned home last week end.

Take time by the forelock. Order your private greeting Christmas Cards from the Star office NOW, and get your first choice from our big sample book.

The property at the Gold Standard refinery is now being painted and put in shape for the coming winter.

We learn that Miss V. Wittmann, who moved from town to Edmonton with her parents last year, has now been appointed on the staff of the Bank of Montreal there.

Miss Joyce Lally entertained a number of her young friends at her birthday party at Clear Lake at the week end.

## Listen Folks!

Are You  
GETTING THE MOST OUT  
OF LIFE?

It Starts September 5th  
Monday Through Friday  
8:45 a.m.

A Fleischmann Yeast Presentation

We understand that Mr. Lyman Alexander is moving his family into the Wade house on Sixth ave. east, formerly occupied by Mr. T. Wright while Mr. Syd Smith and his mother are moving into the Fred Aykroyd house, formerly the residence of Bob Dunamore.

Mr. and Mrs. Joe Welch and their daughter Beale spent Sunday last at Elk Island park and report that the roads in that park are gravelled and every facility provided for golf and other sports as well as camping, bathing, etc. It is on that account, largely patronized by numbers from Edmonton and surrounding points.

Messrs. Sid Worton and Mel Ford were over from Camrose on Sunday, renewing old acquaintances here.

Mrs. Helen Aykroyd, who has been spending a holiday with friends here, returned to her home in the city last week.

Despite rumors to the contrary, we are happy to inform our readers that we have full proof that the reported case of infantile paralysis was never such—Miss Mary Davison was placed under observation in hospital but was later discharged and holds a medical certificate to this effect.

Get the first choice of private greeting Christmas Cards from the big sample book at the Star office. Phone 155, we'll call any time and give you prices. They're the best obtainable.

## The Legion Notice Board

As the date of our regular monthly meeting for September falls on the 5th, which is Labor Day and a public holiday, we are postponing same for one week, making the date September 12th. All interested will please note.

We received a letter a few days ago from a pensioner with children asking if there was any provision in the Pension Act whereby one or more of them could continue in the receipt of pension allowance after reaching statutory age, and as the provision of the Pension Act in this regard may be of some interest to others we quote from Section 22 as follows:

"No pension shall be paid to or in respect of a child who, if a boy, is over the age of sixteen years or, if a girl, is over the age of seventeen years, except when such child and those responsible for its maintenance are without adequate resources, and such child is following and is making satisfactory progress in a course of instruction approved by the Commission in which case the pension may be paid until such child has attained the age of twenty-one years."

Just what is meant by the words "course of instruction approved by the Commission" we do not know, but we are making it our business to find out.

ST. JOSEPH'S CONVENT

Her many friends in this district will be pleased to learn that Miss Olive Wheeler, formerly on the nursing staff at the hospital, has now been placed on the staff of a similar institution at Orange, California, which was this young lady's high ambition.

Mr. and Mrs. George Perkins, of Edmonton, were entertained on Wednesday by Mrs. H. C. Wallace at her cottage at Clear Lake. Mrs. Boyd, of Calgary, who has been a guest of Mrs. Wallace for the past couple of weeks, returned to Edmonton with them.

Mr. Bill Stuart, who has been on the sick list for so long and who has been latterly taking treatments at Banff mineral springs, returned home last week much improved in health.

Mrs. W. S. Clark entertained at a bridge party last week, when Mrs. Boyd, of Calgary, and Mrs. G. Perkins, her daughter, of Edmonton, were the honored guests.

Messrs. Allan Bradley and G. Johnson, of Camrose, visited at the week end with old friends here.

Miss S. Walker spent a few days in the city last week.

Helen Fradick was a patient at the hospital last week for an appendix operation.

On Sunday morning last, owing to slipping and falling in her kitchen on the farm, Mrs. Arthur Sharp unfortunately sustained a broken arm. She is now at the hospital where the injury is progressing nicely.

Be sure that you have sufficient storage for your grain this year. Join the crowd who are hauling out granary lumber from the Atlas yard. Joe Welch, mgr.

Mrs. A. Anderson and Mrs. Bob Lewis are spending a week at Clear Lake in the St. Lawrence there.

Mrs. Trewatha is away on a visit to friends at Lethbridge and Bowden for a short holiday.

We understand that Herman Anderson is getting along nicely now, following an operation for appendicitis at the hospital.

Mrs. Moore and her young son from Edmonton are guests at the home of Mr. and Mrs. Tom Daniels.

Mrs. M. Herbert and her wee twin sons are staying with Mr. and Mrs. Tom Herbert at Heath.

Mrs. S. Simmons and her granddaughter Wilma are spending a week in the city.

Having completed a most enjoyable 9,000-mile tour through the States and Eastern Canada, Miss E. Hart returned home last week end.

Our old friend and townsman, Jimmy Bracciglieri from Lindbrook, was in town last week end with his usual "Cheerio". Of course his "best girl" Gladys was along also.

E. W. Beazley took out a rubber-tired tractor last week end from the Massey Harris warehouse in town.

Miss Madeleine Gadd, of Hardisty, was visiting friends in town over the past week end.

We insure grain in granaries, and all metal separators not over three years old against prairie, stubble or bush fires from any origin or cause. Joe Welch, automobile and fire insurance.
